

Report Date: 01 Feb 2013

Summary Report for Individual Task
071-070-0002
Perform a Function Check on an M202A1 Multishot Rocket Launcher
Status: Approved

DISTRIBUTION RESTRICTION: Distribution authorized to U.S. Government agencies only.

DESTRUCTION NOTICE: Destroy by any method that will prevent disclosure of contents or reconstruction of the document

Condition: Given an M202A1 multishot rocket launcher and a requirement to perform a function check. Some iterations of this task should be performed in MOPP.

Standard: Complete operational checks and verify the operational status of the launcher.

Special Condition: None

Special Standards: None

Special Equipment: None

MOPP: Sometimes

Task Statements

Cue: None

DANGER

None

WARNING

None

CAUTION

None

Remarks: None

Notes: None

Performance Steps

1. Unfasten the latch on the rear dust cover and rotate the cover down. Ensure that the latch, hinge, and cover are serviceable.
2. Check the front cover trigger handle interlock system:
 - a. Unfasten the latch on the front cover, rotate the front cover handle outward until it stops, then rotate the front cover down below the launcher tubes applying sufficient pressure to lock it in the down position and allowing the trigger handle to be released from its retracted position.
 - b. Pull the trigger handle assembly down and lock it in position.
3. Check the firing pin mechanism assembly and trigger safety:
 - a. Grasp the firing pin mechanism housing; hold it firmly and fully extend it from the launcher. Do not allow the firing pin housing to rotate.
 - b. Move the trigger safety button to the FIRE position and pull the trigger. The firing pin should protrude from the housing.
 - c. Move the trigger safety button to the SAFE position and pull the trigger. The trigger should not operate.
 - d. Retract the firing pin housing back into the launcher
4. Restore the rear dust cover and fasten the latch.

(Asterisks indicates a leader performance step.)

Evaluation Preparation: SETUP: At the test site, provide the Soldier with all the equipment given in the task condition statement.

BRIEF SOLDIER: Tell the Soldier to perform a function check on the M202A1 multishot rocket launcher.

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. Unfastened the latch on the rear cover and rotated the cover down.			
2. Checked the front cover trigger handle interlock system.			
3. Checked the firing pin mechanism assembly and trigger safety.			
4. Restored the rear dust cover and fastened the latch.

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Units will assess environmental risk using the checklist and assessment matrixes in TC 3-34.489 and FM 3-100.4. Always be alert to ways to protect our environment during training and missions. In doing so you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects.

Safety: In a training environment, leaders must perform a risk assessment in accordance with FM 5-19, Composite Risk Management. Leaders will complete a DA Form 7566 COMPOSITE RISK MANAGEMENT WORKSHEET during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel

are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, NBC Protection, FM 3-11.5, CBRN Decontamination. Everyone is responsible for safety. A thorough risk assessment must be completed prior to every mission or operation.
